- COMPASSION
- FAMILY

**Our team at Hurtt Family Health Clinic believes in providing quality addiction and chemical dependency services that treat people with dignity and compassion through the process of healing the whole person.**

*For general information, call the Addiction Medicine Coordinator 714-247-4323*

# ADDICTION SERVICES OVERVIEW

Hurtt Family Health Clinic offers addiction medicine and chemical dependency services to treat patients with many types of substance use including opioids, stimulants, sedative hypnotics, kratom, cannabis, inhalants, nicotine, hallucinogens and others.

We also see patients without an addiction for a chemical dependency consultation. This includes patients who want to taper off substances such as cannabis, opioids or benzodiazepines.

Additionally, referrals for behavioral addictions such as masturbation/pornography/sex, love, shopping, internet/social media, gambling, work and videogames will be considered.

Hurtt Family Health Clinic offers substance use disorder medications including but not limited to buprenorphine/suboxone, naltrexone and naloxone. We will soon have injectable sublocade and vivtrol available as well.

# ADDICTION MEDICINE

Our patients are supported by a compassionate and competent team that include physicians, nurse practitioners, physician assistants, nurses, therapists and care coordinators.

# BEHAVIORAL HEALTH SERVICES

We have a team of therapists that will help walk you through trauma and other areas that need reparation and healing. For an appointment, call our main clinic line at 714-247-0300.

# RECOVERY COORDINATOR

Get additional case management and recovery support from our Addiction Recovery Coordinator who will help you navigate your journey.

# THERAPY GROUPS

We facilitate weekly groups to support the process of recovering. Please call 714-247-4323 for more information on enrollment.
